USER GUIDE

Compliance Management System

**"A complete guide to navigate and use the
Compliance Management System
efficiently"**

Developed By:

R. Manasa

S. Chandini

S. K. Shreya

About This Guide

This user guide serves as a comprehensive reference for navigating and utilizing The Apollo University Compliance Management System. It is designed to assist users across all roles—Super Admin, Department Admin, and Executive Member—in effectively managing institutional compliance workflows.

The guide outlines step-by-step instructions on system access, task creation and tracking, calendar-based task visualization, report generation, user management, and automated notification handling.

Whether you're assigning tasks, monitoring progress, or reviewing compliance reports, this document ensures that you can operate the system efficiently and with confidence.

1. GETTING STARTED

1.1 Access the System

- URL: <https://compliance-management-apollo1.onrender.com>
- Recommended Browsers: Chrome, Firefox, Edge (latest versions)

1.2 User Roles & Sample Login

- Super Admin – Tech@gmail.com / 1234
- Department Admin – dept@gmail.com / 1234
- Executive Member – c@gmail.com / 3333

2. Logging In

- Navigate to the URL
- Enter email & password
- Click Login
 - On success, you're directed to your dashboard

2.1 Login Page

Figure 2.1: Users must enter the assigned email and password, then click "Login" to access their dashboard.

3. Dashboard Overview

After logging in, users are directed to the Dashboard, which is the central hub of the Compliance Management System. It allows users to view, create, and manage compliance tasks based on their assigned role

3.1 Navigation & Layout

Figure 3.1: Dashboard page showing navigation tabs, logout button, bell icon for overdue notifications, and task creation section.

The top menu includes the following key navigation buttons:

- Dashboard: View tasks, create new ones, and manage task status.
- Calendar: Visualize tasks by their due dates on a calendar.
- Reports: Access charts showing task completion and department-wise distribution.
- Settings: (Admin only) Manage users and access audit logs.
- Logout: Securely exit the system.
- Bell Icon 🔔: Displays the number of overdue tasks with a red badge.

3.2 Role-Specific Permissions

The Compliance Management System provides different access levels based on user roles to ensure that each user only interacts with the features relevant to them.

- Super Admin and Department Admin have full control over task management. They can create new tasks, assign them to users, edit task details, and delete tasks when necessary.
- Executive Members, on the other hand, have limited access. They can only view the tasks that have been assigned to them and update their status (e.g., mark as complete).

This role-based structure ensures data security, minimizes confusion, and streamlines the task workflow across different departments.

Dashboard

This section will display all your department's tasks, task creation form, and task status management. You can add a task, mark it completed, or delete it.

Add New Task

Title

Description

Choose File No file chosen

Select a User

Finance

Chandini (Admin)

indu (IT)

chandini (IT)

TechCheck (Finance)

DeptAdmin (IT)

Figure 3.2.3: User Assignment Dropdown-Select a user to assign the task to. The list shows available members with their department.

Internal

Internal

External

Figure 3.2.4: Category Dropdown-Select the task category — choose "Internal" for within the organization or "External" for tasks involving outside parties.

Figure 3.2.5: *Calendar Picker*-Click the calendar icon to open the date picker and select a due date for the task.

3.3 Common Features

- 1.Task List is displayed by default under the dashboard.
- 2.Users can filter tasks by:
 - Department
 - Category
 - Due Date
- 3.Keywords in the title or description
 - Attachments can be downloaded if uploaded with a task.
 - Notifications appear through the bell icon in the top right.

Figure 3.3.1: *Task list filters* – users can search by title/description, filter tasks by department, category, or due date range.

Title	Description	Assigned To	Department	Category	Due Date	Status	Attachment	Actions
GST Payment	Submit monthly GST	Chandini	Finance	External	12/6/2025	Completed	—	Delete
GST	GST GOV	indu	IT	External	18/6/2025	Completed	—	Delete
Budget Allocation Approval	Approval pending for the annual budget allocation for department	Manasaa	Finance	Internal	18/6/2025	Completed	Download	Delete
Security Audit	Internal security audit	Shreya	IT	Internal	20/6/2025	Completed	Download	Delete
Electricity check	Internal electricity check	chandini	Admin	Internal	2/7/2025	Overdue	—	Complete Delete

Figure 3.3.2: Task list table showing all existing tasks with details such as title, department, assigned user, due date, status, and available actions like file download or deletion.

4. Calendar View

The Calendar View shows all tasks based on their due dates.

- Each task appears on the day it is due.
- Users can click on any date to view tasks for that day.
- The arrows let users move between months.
- The "Today" button brings them back to the current date.

This view helps users plan ahead and stay on top of upcoming deadlines.

Figure 4.1: Calendar view showing task deadlines by date. Clicking on any day opens a list of tasks due on that date.

Figure 4.2: Calendar view showing tasks

5. Reports

1. The Reports section gives users a quick overview of task progress in the system.

2. At the top, it shows four summary boxes:

- Total tasks
- Completed tasks
- Pending tasks
- Overdue tasks

Figure 5.1: Report summary cards showing total tasks, completed, pending, and overdue counts for a quick system overview.

3. Below the summary, there are two charts:

- A Pie Chart shows the status of all tasks (completed, pending, overdue).
- A Bar Chart shows the number of tasks in each department.

4. Users can also:

- Filter the reports by department
- Download the report as a PDF

This section helps users easily understand how the tasks are progressing and where attention is needed.

Figure 5.2: Pie chart showing the distribution of tasks based on their current status.

Figure 5.3: Bar chart displaying department-wise task distribution with options to filter and download the report.

6. Settings (Admin Only)

1. The Settings section is only visible to Super Admins and Department Admins.
2. Admins can create new users by filling out the user details and assigning a role.
3. Each user is linked to a department and a role type (Super Admin, Department Admin, or Executive Member).

4. Creating a New User: Steps

- Click on the Settings tab in the sidebar.
- Go to the User Management section.
- Fill in:
 - Full Name
 - Email
 - Password
 - Department
 - Role (Super Admin, Dept Admin, Executive)
- Click "Create" to add the new user.

This allows admins to manage access and responsibilities across departments.

Settings

Create New User

Name

Email

Password

Finance

Select Role

Create User

Enter the user's full name

Enter user's email ID

Set a secure password

Select the user's department

Assign user role (Admin/Executive)

Click to create new user

Figure 6.1: Admin-only user creation form where new users are added with their name, email, department, role, and password.

6.2 User Role Management (Admin Only)

Admins can view and manage all registered users.

They can:

- Change user roles (Super Admin, Dept Admin, Executive)
- Edit user details like email or department
- Delete users if needed

This ensures the right access is given to the right people.

Filter by Department:

All

User Role Management

Name	Email	Department	Current Role	Change Role	Save	Delete
Apollo Admin	admin@apollo.com	IT	dept_admin	Dept Admin	Save	Delete
Manasa	manasa@example.com	IT	executive	Executive	Save	Delete
Manasaa	jmanasa2k5@gmail.com	Finance	super_admin	Super Admin	Save	Not allowed
Shreya	neobong23@gmail.com	IT	super_admin	Super Admin	Save	Not allowed
Chandini	chandinis@gmail.com	Admin	super_admin	Super Admin	Save	Not allowed

Click here to filter by department

Figure 6.2: User management table where admins can update roles, edit user info, or delete accounts.

6.3 Audit Logs (Admin Only)

1. The Audit Logs section shows a list of actions performed by users in the system.
2. Admins can:
 - View who made changes
 - See what action was done (like create, update, or delete)
 - Check the date and time of each activity

This helps track system usage and ensures accountability.

Time	Action	Performed By	Details
7/7/2025, 2:19:30 PM	Delete Task	Manasaa	Task "GST 3" deleted from Finance department
7/7/2025, 2:19:17 PM	Create Task	Manasaa	Task "GST 3" created for Finance department
7/7/2025, 2:17:54 PM	Delete Task	Manasaa	Task "GST 3" deleted from Finance department
7/7/2025, 2:17:40 PM	Task Status Updated	Manasaa	Marked task "GST 3" as completed
7/7/2025, 9:01:08 AM	Create Task	Apollo Admin	Task "GST 3" created for Finance department
7/6/2025, 7:40:44 PM	Create Task	Manasaa	Task "Fire check" created for Finance department
7/6/2025, 7:36:08 PM	Create Task	Manasaa	Task "Internal check" created for Admin department
7/6/2025, 7:35:28 PM	Delete Task	Manasaa	Task "Internal check" deleted from Admin department
7/6/2025, 7:35:12 PM	Task Status Updated	Manasaa	Marked task "Internal check" as completed
7/6/2025, 7:30:46 PM	Create Task	Manasaa	Task "Internal check" created for Admin department

Figure 6.3: Audit logs table showing user actions with timestamps and details, helping admins monitor system activity.

Only Super Admins and Department Admins can access and manage users or view audit logs.

7. Notifications

7.1 In-App Alerts

- Bell icon displays number of overdue tasks
- Click bell to view a list of important alerts

Figure 7.1: Bell icon showing the number of overdue tasks. Users can click the calendar to view tasks that need immediate attention.

9.2 Email Notifications

System sends automated emails daily at 8:00 AM

Sent to users with:

1. Overdue tasks
2. Friendly reminder with task name and due date

Sample Overdue Task Email Notification

This is an example of the email sent automatically to users with overdue tasks. It includes the task title, due date, and a reminder to take necessary action.

10. Pros

1. Clean, Intuitive UI

- The dashboard uses clear typography, icons and whitespace, making navigation straightforward for all roles.

2. Role-Based Access Control

- Super Admin, Department Admin and Executive Member each see only the features they need—minimizing clutter and enforcing security.

3. Robust Task Filtering & Search

- You can filter by department, category, due date or full-text search on title/description, which makes locating specific tasks lightning-fast.

4. Calendar Integration

- Visualizing tasks in a calendar view helps with planning and spotting bottlenecks at a glance.

5. Automated Email Notifications

- Daily 8AM reminders for overdue tasks keep users on top of deadlines without manual follow-up.

6. Comprehensive Reporting

- Pie and bar charts update in real time, and you can export PDF reports—great for compliance audits or leadership reviews.

7. Scalable NoSQL Backend (MongoDB)

- The system uses MongoDB, which handles large volumes of document-style data well and allows schema flexibility as your compliance rules evolve.

8. Audit Trail & User Management

- **Detailed logs of all user and task actions plus easy user CRUD give you accountability and administrative control.**

11. Cons / Limitations

1. No Self-Service Password Reset

- If a user forgets their password, they must contact an admin—adding friction and support overhead.

2. Lack of In-App Collaboration

- There's no comment or discussion feature on tasks; users must rely on email or external chat, which can fragment context.

3. Desktop-Only Layout

- The current responsive design struggles on small screens, so there's no true mobile-first experience for users on the go.

4. File Upload Size Cap (2 MB)

- Restricting uploads to 2 MB may prevent attaching larger documents (e.g., high-res scans, detailed reports).

5. No Real-Time Notifications

- The bell icon only updates on page refresh; there's no WebSocket/push mechanism to alert users immediately when a task changes.

6. Minimal On-Page Help

- Tooltips or contextual help are sparse—new users may need the guide frequently until they're fully familiar with each screen.

7. Limited Export Formats

- Reports export only to PDF; having CSV/Excel export for raw data analysis would be beneficial for power users.
